PROFESSIONAL SUMMARY

Aspiring Java Developer seeking an opportunity to apply my skills in core Java, backend development, and database management to build efficient, scalable applications. Eager to contribute to real-world projects and grow in a collaborative, learning-focused environment.

EDUCATION

Vidyavardhaka College of Engineering, 2022 – 2026 | 8.36 CGPA

Bachelor of Engineering CSE(AI & ML)

Relevant Course : Data Structures, Object oriented Programming, Database Management System, Basics of AI, Machine Learning, Deep Learning

SKILLS

Programming Languages
Java, Python, SQL

Testing
JUnit, Mockito, Unit Testing

Soft Skills & Collaboration
Team Collaboration, Team Management, Event Planning, Problem Solving.

Frameworks & APIs
Spring Boot, Hibernate, REST APIs

Data Science, Analytics & Visualization
Data Preprocessing, Model Development, Predictive Analytics, Pandas, NumPy, Matplotlib, Power BI, Tableau

Web, Cloud & DevOps Tools
AWS, Docker, Jenkins, Git, GitHub, MySQL, VS Code, Jupyter Notebook

INTERNSHIPS

Data Analyst Intern Jun 2024 – Aug 2024

Organization: IBM SkillsBuild & CSRBOX

- Developed and integrated a heart disease prediction module into a web application using Python, Scikit-learn, and REST APIs.
- Designed end-to-end data pipeline (ETL to inference) and led a 4-member team following Agile practices and Git-based workflows.
- Focused on backend logic optimization, ensuring accurate real-time risk classification with clean, maintainable code.

PROJECTS

Employee Management System
Java | Spring Boot | Web Application Development

- Developed a robust Employee Management System using Spring Boot to perform efficient CRUD operations.
- Implemented backend logic for employee data handling and database integration. Tech Stack: Java, Spring Boot, MySQL

Colon Disease Detection Using CNN
Deep Learning | Medical Image Analysis | Computer Vision

Built a CNN-based system to classify colonoscopy images into Normal, Ulcerative Colitis, Polyps, and Esophagitis.

- Implemented model training and real-time prediction using user-selected medical images. Tech Stack: Python, TensorFlow, Keras, OpenCV

Spelling and Grammer checker

- NLP | Python | Web Application Development
- Developed an NLP-based grammar and spelling checker using a Transformer (T5) model for accurate text correction. Built a Flask web application to provide real-time sentence improvement.
